

Update on Temporary Closure of Salesforce Transit Center

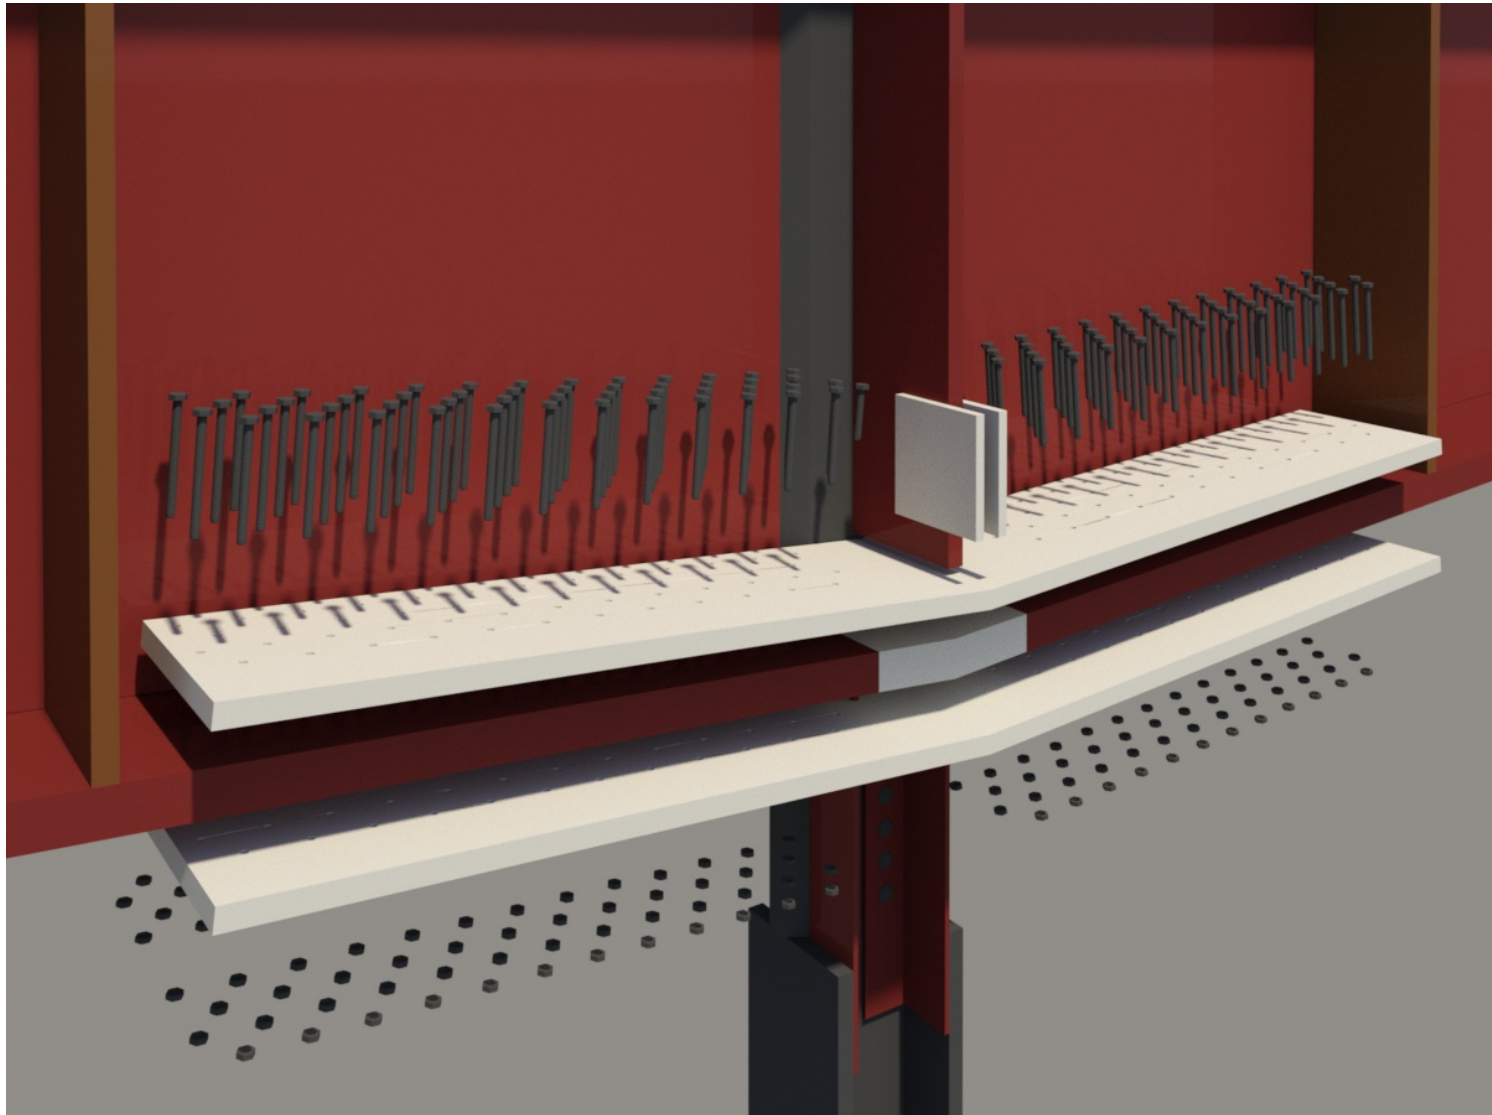

March 12, 2019

Steps to Reopen

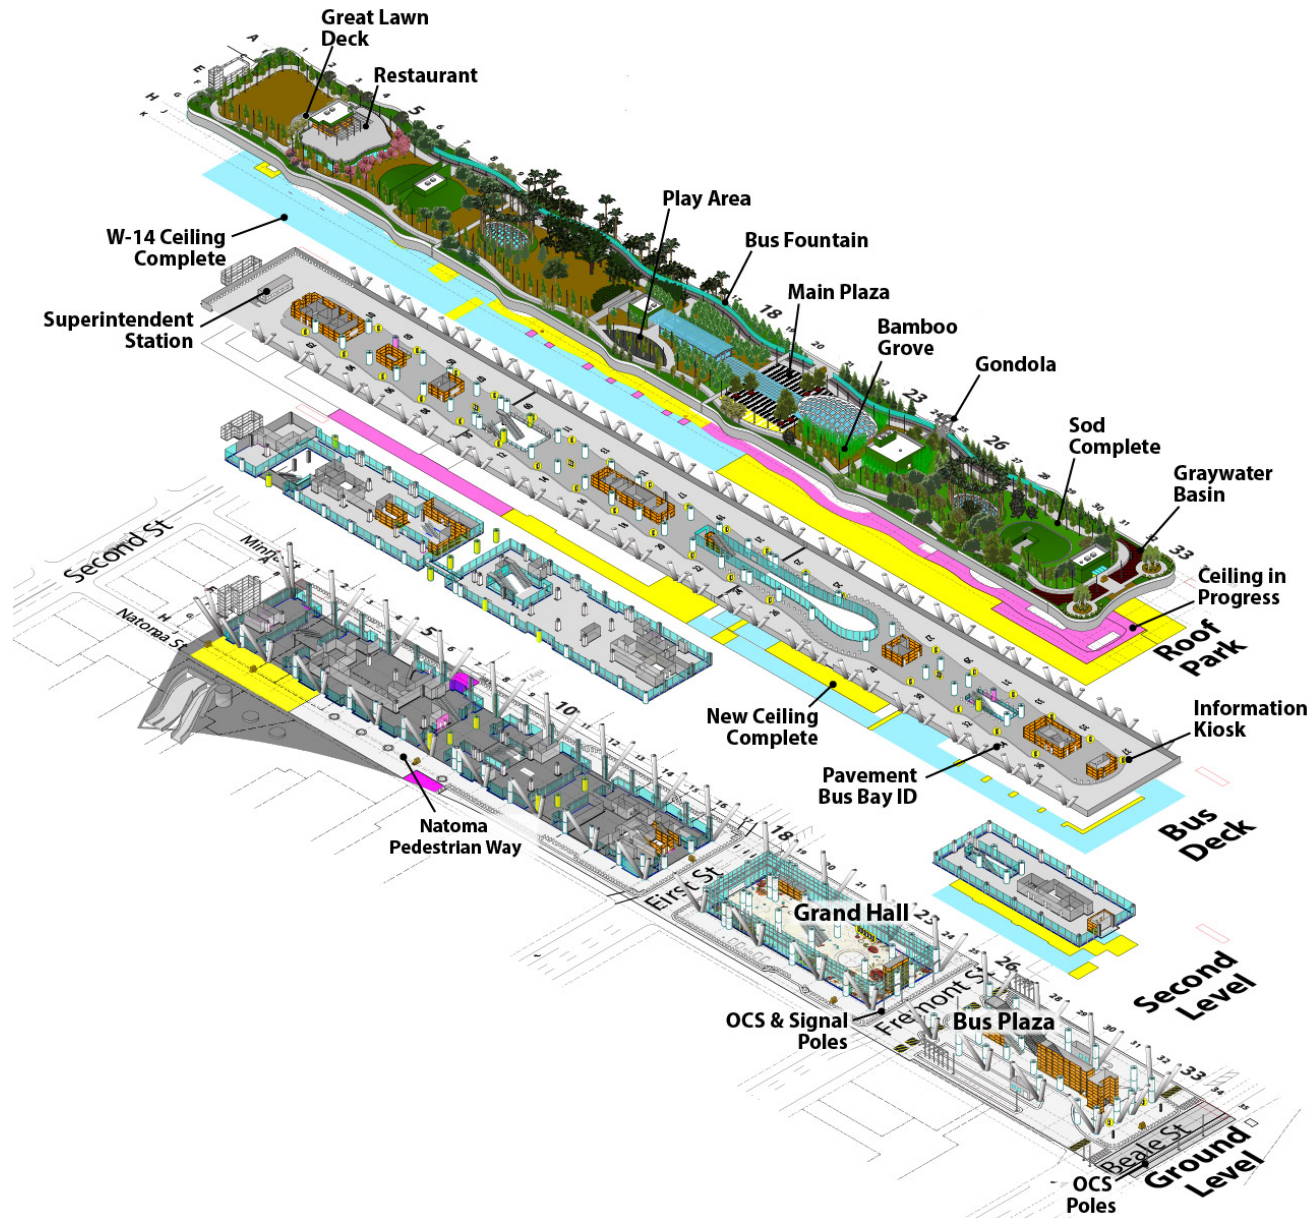

- ✓ Repair beams on Fremont Street & proactively reinforce similarly designed area at First Street
- ✓ Conduct exhaustive review of facility
- ✓ Fully cooperate with independent review by the Metropolitan Transportation Commission
- ✓ Complete a facility-wide life & safety reinspection program with city and state oversight
- ✓ Open facility & resume transit operations

Girder Remediation Detail

This graphic has details specific to Fremont street girders

Facility-Wide Validation Framework

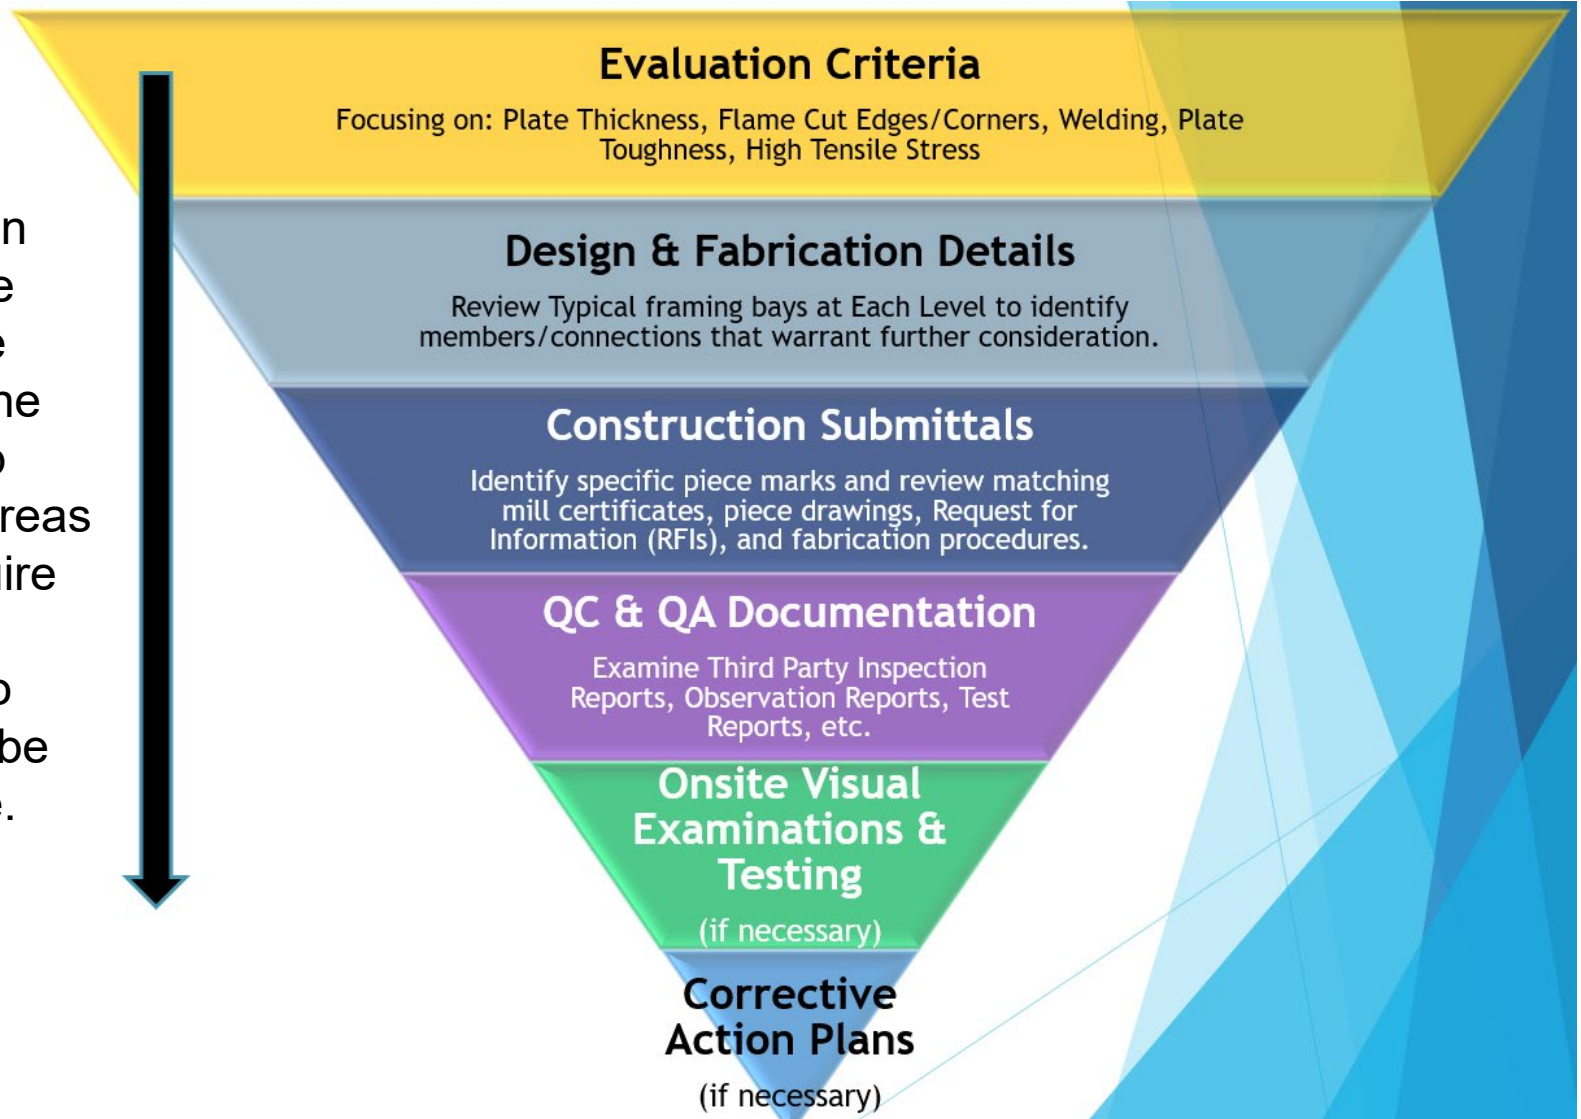

Facility-Wide Validation Framework

- Reaffirm Structural Integrity of Building
- Review Tests & Inspection Records completed in March
- Building Management Systems Commissioning completed in April
- Revalidate Full Fire & Life Safety Systems completed in May
- Re-Occupancy Readiness Strategy

Facility-wide Validation

Full Building Structural Health Check

Progression through the successive sieves of the funnel help separate areas which require further research to confirm to be acceptable.
