

Learn more about the Geary/19th Ave Subway and Regional Connections Study

The San Francisco County Transportation Authority, in coordination with the SFMTA and the San Francisco Planning Department, is studying a potential new rail subway under Geary Boulevard and 19th Avenue.

This potential investment could:

- Better connect communities within San Francisco and to the broader Bay Area
- Advance our city's long-term transportation, climate, and housing goals and needs
- Improve travel time and reliability for all types of trips

The study will lay out the strategic choices and planning considerations for this potential major capital investment.
