RESOLUTION APPROVING SAN FRANCISCO'S INPUT ON THE PLAN BAY AREA 2040 DRAFT PREFERRED SCENARIO

WHEREAS, The Metropolitan Transportation Commission (MTC) and the Association of Bay Area Governments (ABAG) are currently developing Plan Bay Area 2040 (PBA 2040), the Bay Area's Regional Transportation Plan/Sustainable Communities Strategy (RTP/SCS) that adopts a land use vision and a transportation strategy to guide the region's growth and investment through 2040; and

WHEREAS, This planning cycle is considered a focused or minor update to the region's first RTP/SCS adopted in 2013, meaning it will largely retain the framework and contents of PBA 2013, and will focus primarily on updating information for projects in the current plan as well as furthering policy and sector work in a few areas which didn't receive as much attention during the last cycle; and

WHEREAS, As Congestion Management Agency for San Francisco, the Transportation Authority serves as the coordinator for San Francisco input into PBA 2040, and has over the past year and a half worked closely with City agencies, regional transit operators and other San Francisco project sponsors to provide San Francisco input to PBA 2040; and

WHEREAS, In October 2015, the Board-adopted San Francisco's goals and advocacy objectives for PBA 2040 (Attachment 1), which have guided the Transportation Authority's input to date, along with the San Francisco Transportation Plan (SFTP); and

WHEREAS, Existing PBA 2013 projects and the SFTP served as the starting point for identifying San Francisco projects and programs for inclusion in PBA 2040, which was then supplemented by input from public agency staff and members of the public through a call for projects issued by the Transportation Authority in May 2015; and

WHEREAS, In October 2015, the Transportation Authority Board adopted a list of San

Francisco project priorities to submit to MTC and ABAG for inclusion in PBA 2040; and

WHEREAS, Building on substantial local and regional efforts and inputs over the past year and a half, including, but not limited to project performance evaluation and land use/transportation scenario testing, MTC and ABAG released their draft preferred land use scenario and transportation investment strategy for PBA 2040 in September 2016 and have asked for comments to be submitted in advance of adopting the Final Preferred Scenario at a joint meeting of both agencies' boards on November 17; and

WHEREAS, Attachment 2 summarizes the San Francisco projects proposed for inclusion in the financially constrained draft PBA 2040 transportation investment strategy, as well as regional projects of interest to San Francisco; and

WHEREAS, Working closely with the San Francisco Planning Department (Planning Department) and the San Francisco Municipal Transportation Agency (SFMTA), while consulting with other San Francisco project sponsors, Transportation Authority staff have evaluated the Draft Preferred Scenario and believe that it achieves many of San Francisco's goals and objectives for PBA 2040, such as ensuring that all of the projects that need to be included in this PBA planning cycle are included and seeking a greater level of investment in transit state of good repair and core capacity; and

WHEREAS, Based on their evaluation of the Draft Preferred Scenario, Transportation Authority, Planning Department and SFMTA staff jointly developed the proposed San Francisco input into PBA 2040, which among other points, calls out the poor performance of the Draft Preferred Scenario regarding goals for improving housing affordability and mitigating risk of displacement and urge ABAG and MTC to identify tools, resources and a legislative agenda necessary to meet these goals; and

WHEREAS, Given that San Francisco is one of the three big cities taking on most of the jobs and housing growth in PBA 2040, the proposed input calls for MTC to help direct "real"

transportation dollars to support state of good repair, Vision Zero safety improvements, and transit modernization and capacity expansion that are necessary to support access to the assigned jobs and housing within San Francisco; and

WHEREAS, At its October 11, 2016 meeting, the Plans and Programs Committee reviewed the subject request and unanimously recommended approval of the staff recommendation; now, therefore, be it

RESOLVED, That the Transportation Authority hereby approves San Francisco's input on the PBA 2040 Draft Preferred Scenario as described in Attachment 3; and be it further

RESOLVED, That the Executive Director is directed to submit the input to MTC and ABAG and to other relevant parties.

Attachments (3):

- 1. San Francisco Adopted Goals and Advocacy Objectives
- 2. List of San Francisco Projects in the Plan Bay Area 2040 Draft Preferred Scenario
- 3. Proposed San Francisco Input on the Plan Bay Area 2040 Draft Preferred Scenario

The foregoing Resolution was approved and adopted by the San Francisco County Transportation Authority at a regularly scheduled meeting thereof, this 25th day of October, 2016, by the following votes:

Ayes:

Commissioners Avalos, Breed, Campos, Cohen, Farrell, Kim, Mar,

Attachment 1 Plan Bay Area (PBA) 2040 – Draft San Francisco Goals and Objectives

FINANCIAL

1. Ensure all San Francisco projects and programs that need to be in the 2017 PBA are included.

This includes:

- Projects that need a federal action (e.g. NEPA approval) or wish to seek state or federal funds before 2021 when the next PBA will be adopted.
- Projects that trigger federal air quality conformity analysis (e.g., projects that affect demand and/or change transit or roadway capacity and can be modeled).
- Note: most projects can be included in programmatic categories.
- 2. Advocate strongly for more investment in transit core capacity and transit state of good repair.
 - Reach out to the "Big 3 Cities" accepting most of the job and housing growth in PBA and to the largest transit operators to develop a unified set of advocacy points and funding strategies for existing and new revenue sources (e.g. advocate for transit's inclusion in new revenue measures being considered in the Extraordinary Legislative session).
 - Core Capacity Transit Study (CCTS) Advocate for regional discretionary funds to advance planning and evaluation of recommendations that emerge from the CCTS. Examples of projects under consideration include HOV lanes on the Bay Bridge for buses and carpools; BART/Muni tunnel turnbacks, crossover tracks or other operational improvements; and a second transbay transit crossing.
 - Cap and Trade Advance San Francisco priorities through a revised regional cap
 and trade framework that accounts for higher than anticipated revenues and insights
 gained from first programming cycles. Support SFMTA's efforts to secure funds
 from the Transit and Intercity Rail Capital Program (TIRCP) to pay back light rail
 vehicle loans/advances from MTC.
 - Seek confirmation of existing regional endorsements for Federal Transit Administration **New Starts/Small Starts/Core Capacity funds** (e.g. Downtown Extension) and new endorsements (e.g. Geary BRT).
 - Prioritize transit SOGR and core capacity fornew revenue sources (See #3).
 - Blended High Speed Rail (HSR)/Caltrain Service Continue to advocate for platform height compatibility and for the extension of Caltrain to the Transbay Transit Center, the northern terminus of HSR. Coordinate with San Mateo, Santa

Attachment 1

Plan Bay Area (PBA) 2040 - Draft San Francisco Goals and Objectives

Clara, Caltrain and the California High Speed Rail Authority to plan and prioritize the Blended HSR/Caltrain project for federal, state and regional funds.

- Increase share of existing revenues going toward San Francisco priorities (bigger pie wedge)
 - **OBAG** Advocate to put greater weight on actual housing production and on planned and produced affordable housing within the existing OBAG formula (consistent with initial MTC staff proposal for OBAG Cycle 2).
 - Revisit Transit Performance Initiative program focus and advocate for better integration with the Freeway Performance Initiative (e.g. build into definition of Managed Lanes Implementation Plan (MLIP)).
 - Press for multimodal corridor approach to Freeway Performance Initiative and inclusion of San Francisco freeway managed lanes projects in the MLIP_as well as inclusion of SFgo and Treasure Island tolling infrastructure in MTC's Active Operations Management Program, Target regional discretionary funds for high performing projects and regionally significant San Francisco projects (e.g. Better Market Street, express lanes, late night transportation services, regional express bus)
- 4. Advocate for new federal/state/regional revenues through PBA (grow the pie)
 - Regional Gas Tax
 - RM3 bridge toll
 - BART 2016 measure
 - State Extraordinary Legislative Session
 - State Road User Charge
 - Federal surface transportation bill advocacy

POLICY

- 1. **Vision Zero** Increase eligibility of Vision Zero projects (including local streets and roads and San Francisco freeway segments/ramps) and project elements in existing and new fund programs and elevate as a funding priority within regional fund programs.
- 2. Continue to support performance based decision-making This includes continuing to advocate for establishing a transit crowding metric or otherwise better capturing transit crowding in Plan Bay Area's performance evaluation, given that transit crowding is a significant transit core capacity issue.
- 3. **Economic Performance** –Provide San Francisco input to shape and lead on regional policy on economic performance, including goods movement. Build off of Bay Area Council Institute's work on this goal area, which is also related to the Prosperity Plan and MTC's work on goods movement.

Attachment 1

Plan Bay Area (PBA) 2040 - Draft San Francisco Goals and Objectives

- 4. **Equity issues** (Develop San Francisco policy recommendations related to the following equity issues in PBA, many of which overlap.)
 - Access to transportation Build off of Late Night Transportation Study, Prosperity Plan
 - **Affordability** Build off of MTC study on a means-based regional pass/discount; BART university pass/discount and identify sustainable fund sources
 - Communities of Concerns Advocate for money to continue MTC's Community Based Transportation Planning grant program; support more funds for the Lifeline Transportation Program
 - Housing/Displacement How should concerns about displacement be reflected in PBA goals, objectives, and policy? Should we push for PDA and PDA-like areas region-wide to take on more of a fair share of growth? There is also an argument that non-PDA areas should also take on more housing for fair access to schools, etc.
- 5. **Project Delivery** Seek legislative changes to support Public Private Partnerships, CM/GC and tolling authority and to streamline project delivery.
- 6. **Sea Level Rise/Adaption** Support the City's ongoing Sea Level Rise Resiliency Program, which includes a suite of planning and implementation efforts coordination with regional and local partners. Help shape the regional policy framework.
- 7. **Shared Mobility** To the extent PBA address this topic, provide San Francisco input to shape and lead on regional policy on shared mobility.

Total Project Cost includes costs through construction or other phase as indicated. Costs in Plan Bay Area 2040 may be lower, excluding previously expended funding.

Attachment 3

Proposed San Francisco Input into Plan Bay Area (PBA) 2040

- Transportation investment strategy generally looks good
 - All San Francisco projects that need to be included in PBA 2040 to allow them to advance are included
 - Strong focus on fix-it-first, for local streets and roads and transit; the latter has a higher proportion of funding compared to the current PBA
 - o New emphasis on core capacity transit investments to enable strategic modernization and expansion of our core transit systems to increase reliability, safety and capacity
 - Reconfirmation of existing Federal Transit Administration New Starts/Small Starts/Core Capacity priorities and addition of new ones:
 - Downtown Rail Extension
 - Geary Bus Rapid Transit
 - BART Core Capacity Project
 - Caltrain Electrification
 - Better Market Street (pending confirmation)
- Housing and jobs projections for SF look aggressive (for jobs in particular) but within the realm of the possible
 - Planning Department is working to redistribute proposed growth within SF to be consistent with current plans and policies
 - Annual housing production rate is unrealistically optimistic (and much higher than current production) without additional tools and resources
 - Job growth, too, is significantly higher than what was assigned in PBA 2013 yet lower in San Jose and Oakland, which doesn't make sense given MTC's aspiration to focus growth in housing and jobs in the region's big 3 cities
- The poor performance of the Draft Preferred Scenario regarding goals for improving housing affordability and mitigating risk of displacement mandate that ABAG/MTC identify tools, resources and a legislative agenda necessary to meet these goals
 - Regional and state-level structural reform, with real teeth, is needed to ensure adequate housing production region-wide and to ensure that all cities do their part
 - Significantly increased and stable funding for housing production and preservation is needed, especially if the region makes a commitment to work toward improving its performance in housing affordability and addressing displacement of existing residents
 - ABAG/MTC should work with local jurisdictions to prepare an implementation plan that can be acted on by the time PBA 2040 is adopted in late 2017
 - o To inform the implementation plan, MTC/ABAG should establish a pilot program, to see what it really takes to produce affordable housing and, if possible, also address

job displacement at the same time. An ideal pilot would use regional funds (perhaps NOAH, TOAH) leveraging local dollars to fund similar efforts in 2 or 3 locations facing high displacement risk to see what works in different locations/types (big city, suburb)

- To provide some near-term relief for affordability and displacement pressures, we urge MTC to accelerate funding for Lifeline Transportation Program, Means-Based Fare Implementation, Community Based Transportation Plans, Late Night Transportation, and Regional PDA Planning grants for places facing high displacement risk.
- As one of the three big cities taking on most of the growth in jobs and housing in PBA 2040, San Francisco is willing to do our part but needs MTC to help direct "real" transportation dollars to support state of good repair, Vision Zero safety improvements, and transit modernization and capacity expansion that are necessary to support access to the assigned jobs and housing within San Francisco, which would even more firmly establish the City's role as the region's job center.
 - San Francisco has successfully secured local revenues for transportation and housing and is continuing to seek additional revenues given insufficient and unreliable state and federal funds. As one of the 3 big cities taking on the most job and housing growth in PBA 2040, we want to ensure we are receiving a commensurate share of regional discretionary dollars and not being penalized for seeking and securing new local dollars
 - We look forward to working with MTC to advocate for and secure new revenue sources to help implement PBA's transportation investment strategy such as a Regional Measure 3 bridge toll increase and potential new state and federal sources
