## Memorandum

1455 Market Street, 22nd Floor San Francisco, California 94103 415.522.4800 FAX 415.522.4829 info@sfcta.org www.sfcta.org

**Date:** 04.13.15

RE: Citizens Advisory Committee April 22, 2015

**To:** Citizens Advisory Committee

From: Anna LaForte – Deputy Director for Policy and Programming O

**Subject:** ACTION – Adopt a Motion of Support for the Allocation of \$772,900 in Prop K Funds, with Conditions, and Appropriation of \$90,000 in Prop K funds, Subject to the Attached Fiscal Year Cash Flow Distribution Schedules

## Summary

As summarized in Attachments 1 and 2, we have four requests totaling \$862,900 in Prop K funds to present to the Citizens Advisory Committee (CAC). The San Francisco Municipal Transportation Agency (SFMTA) has requested Prop K funds for three projects, including design of new traffic signals or flashing beacons for eight high-priority intersections, (\$280,000); construction to upgrade traffic signals at nine intersections along Polk Street, a Walkfirst High-Injury Corridor (\$382,900); and Neighborhood Transportation Improvement Program (NTIP) capital funds for conceptual design of key bicycle and pedestrian at two key sites at the Chavez/Bayshore/Potrero intersection and development of an areawide lighting plan (\$100,000). We are requesting \$100,000 for a District 2 NTIP planning effort that evaluates potential options for managing access on the 1000 block of Lombard Street. Of this amount, \$10,000 would be allocated to the SFMTA to support its involvement in the NTIP study. We are seeking a motion of support for the allocation of \$772,900 in Prop K Funds, with conditions, and appropriation of \$90,000 in Prop K funds, with conditions, subject to the attached Fiscal Year Cash Flow Distribution Schedules.

## BACKGROUND

We have four requests totaling \$862,900 in Prop K funds to present to the Citizens Advisory Committee (CAC) at the April 22, 2015 meeting, for potential Board approval on May 19, 2015. As shown in Attachment 1, the requests come from the following Prop K categories:

- New Signals & Signs
- Signals & Signs
- Bicycle Circulation/Safety
- Pedestrian Circulation/ Safety
- Transportation/ Land Use Coordination

Transportation Authority Board adoption of a 5-Year Prioritization Program (5YPP) for Prop K programmatic categories is a prerequisite for allocation of funds from these categories.

## DISCUSSION

The purpose of this memorandum is to present four Prop K (\$862,900) requests to the CAC and to seek a motion of support to allocate the funds as requested. Attachment 1 summarizes the four requests, including information on proposed leveraging (i.e. stretching Prop K dollars further by matching them with other fund sources) compared with the leveraging assumptions in the Prop K Expenditure Plan. Attachment 2 provides a brief description of each project. A detailed scope, schedule, budget and funding plan for each project are included in the attached Allocation Request

Forms.

**Staff Recommendation:** Attachment 3 summarizes the staff recommendations for the requests, highlighting special conditions, 5YPP amendment and other items of interest.

## ALTERNATIVES

- 1. Adopt a motion of support for the allocation of \$772,900 in Prop K Funds, with conditions, and appropriation of \$90,000 in Prop K funds, with conditions, subject to the attached Fiscal Year Cash Flow Distribution Schedules, as requested.
- 2. Adopt a motion of support for the allocation of \$772,900 in Prop K Funds, with conditions, and appropriation of \$90,000 in Prop K funds, with conditions, subject to the attached Fiscal Year Cash Flow Distribution Schedules, with modifications.
- 3. Defer action, pending additional information or further staff analysis.

## FINANCIAL IMPACTS

This action would allocate \$772,900 and appropriate \$90,000 in Fiscal Year 2014/15 Prop K funds, with conditions, for a total of four requests. The allocations and appropriation would be subject to the Fiscal Year Cash Flow Distribution Schedules contained in the attached Allocation Request Forms.

The Fiscal Year 2014/15 Prop K Allocation Summary (Attachment 4) shows the total approved Fiscal Year 2014/15 allocations to date with associated annual cash flow commitments as well as the recommended allocations and cash flows that are the subject of this memorandum.

Sufficient funds are included in the amended Fiscal Year 2014/15 budget to accommodate the recommended actions. Furthermore, sufficient funds will be included in future budgets to cover the recommended cash flow distribution for those respective fiscal years.

## RECOMMENDATION

Adopt a motion of support for the allocation of \$772,900 in Prop K Funds, with conditions, and appropriation of \$90,000 in Prop K funds, with conditions, subject to the attached Fiscal Year Cash Flow Distribution Schedules.

			TOTAL	\$ 862,900	\$-	\$ 2,126,500	38%	59%		

Footnotes

<sup>1</sup>"EP Line No./Category" is either the Prop K Expenditure Plan line number referenced in the 2014 Prop K Strategic Plan or the Prop AA Expenditure Plan category referenced in the 2012 Prop AA Strategic Plan, including: Street Repair and Reconstruction (Street), Pedestrian Safety (Ped), and Transit Reliability and Mobility Improvements (Transit).

<sup>2</sup> Acronyms: SFCTA (San Francisco County Transportation Authority); SFMTA (San Francisco Municipal Transportation Agency).

<sup>3</sup> "Expected Leveraging By EP Line" is calculated by dividing the total non-Prop K funds expected to be available for a given Prop K Expenditure Plan line item (e.g. Pedestrian Circulation and Safety) by the total expected funding for that Prop K Expenditure Plan line item over the 30-year Expenditure Plan period. For example, expected leveraging of 90% indicates that on average non-Prop K funds should cover 90% of the total costs for all projects in that category, and Prop K should cover only 10%.

<sup>4</sup> "Actual Leveraging by Project Phase" is calculated by dividing the total non-Prop K funds in the funding plan by the total cost for the requested phase or phases. If the percentage in the "Actual Leveraging" column is lower than in the "Expected Leveraging" column, the request (indicated by yellow highlighting) is leveraging fewer non-Prop K dollars than assumed in the Expenditure Plan. A project that is well leveraged overall may have lower-than-expected leveraging for an individual or partial phase.

EP Line No./ Category	Project Sponsor	Project Name	Prop K Funds Requested	Prop AA Funds Requested	Project Description
31	SFMTA	New Signal Contract 63 [Vision Zero]	\$ 280,000	\$ -	Prop K sales tax funds will be used to design new traffic signals at six intersections including Folsom & Mabini, 28th Avenue & Fulton, 33rd Avenue & Fulton, 37th Avenue & Fulton, 19th & Dolores and Columbus & Francisco; and flashing beacons systems at the intersections of Monterey & Detroit and O'Shaughnessy & Malta. All locations will have new pedestrian countdown signals, accessible (audible) pedestrian signals, controllers, conduit, wiring, poles, curb ramps (15-20 total), and mast-arm mounted signal heads. Five locations are located on the Vision Zero High Injury Network. Design will be complete by June 2016 and all signals will be activated/ open for use by December 2017.
33	SFMTA	Polk Street Traffic Signal Upgrade	\$ 382,900	\$ -	Sales tax funds will be used to upgrade traffic signals at 9 intersections along Polk Street, a Walkfirst High-Injury Corridor, with pedestrian countdown signals and accessible pedestrian signals. Signal visibility at each intersection will also be improved by better placement of poles and vehicular signal indications. Construction is scheduled to begin in December 2015 and end in December 2016. This project is being coordinated with the Polk Street Streetscape project, which is to begin construction by April 2015.
39, 40	SFMTA	Cesar Chavez/ Bayshore/ Potrero Intersection Improvements [NTIP Capital]	\$ 100,000	\$ -	Neighborhood Transportation Improvement Program (NTIP) capital funds will be used to advance the design of bicycle and pedestrian improvements at two key sites south of Chavez near the U.S. 101 southbound on-ramp at the Chavez/ Bayshore/Potero intersection. Building on recommendations from the Cesar Chavez East Community Design Plan (2012), this project will result in 20% design drawings of wider multi-use path or separated paths providing east-west bicycle and pedestrian access through the interchange area, and accessibility upgrades for the steep grade under the U.S. 101 southbound ramp. The project will also produce a lighting plan for the interchange area. SFMTA will conduct stakeholder outreach including Caltrans involvement and a walking and bike audit of the project area, and develop the design drawings. San Francisco Public Works will perform area surveys and develop the lighting plan. The project will be completed by June 2016.

EP Line No./ Category	Project Sponsor	Project Name	Prop K Funds Requested	Prop AA Funds Requested	Project Description
44	SFCTA, SFMTA	Managing Access to the "Crooked Street" (1000 Block of Lombard Street) [NTIP Planning]	\$ 100,000	\$ -	Requested NTIP planning funds, which are proposed to be matched by \$25,000 from Commissioner Farrell's office, will be used to engage the community, Commissioner Farrell's office, the Lombard Street Working Group, and other relevant stakeholders in a planning effort that evaluates potential options for managing access on the 1000 block of Lombard Street. The purpose of the effort is to identify and evaluate a range of options to manage visitor access and circulation on the "crooked street" while maintaining the character of the street, managing vehicle and pedestrian congestion, avoiding spillover effects into adjacent streets, and other goals. The request includes a \$10,000 allocation to the SFMTA to support its staff work on the NTIP study. The study will be completed by December 2015.

	Prop K sales tax funds toward the design of 6 new traffic signals, 2 flashing in improvements to be constructed under New Signal Contract 63.						

## Background and Scope

In addition to the six new traffic signals and two flashing beacon systems, two non-Prop K funded locations will also be part of Contract 63. All new signal locations will have new pedestrian countdown signals (PCS), accessible pedestrian signals (APS), controllers, conduit, wiring, poles, curb ramps (15 – 20 total), and mast-arm mounted signals.

The locations under this project are as follows:

Tab	Table 1. Contract 63 Locations									
	Prop K – Funded Signals/Beacons

10	Russ and Howard Streets	Traffic Signal	SOMA Fund	One-way stop	6	Y				

## Location Selection Criteria

The intersections in this scope were selected after careful review by SFMTA staff of traffic signal requests received by the Agency each year, as well as locations nominated by staff. Locations are prioritized based on collision history, traffic volumes, benefits to roadway users including pedestrians, bicyclists, transit and motorists, proximity to schools or senior centers and any joint departmental opportunities (e.g. scheduled paving projects, corridor improvements).

All the locations proposed for signalization are intended to improve pedestrian safety on the City's primary and secondary arterial streets. The Agency will be developing a separate but concurrent new signal contract which addresses intersections that are in the Walkfirst Pedestrian High-Injury Corridors. That separate project will be funded by Walkfirst funds.

The intersections in this subject request involve multi-lane streets like Folsom Street, Fulton Street, Dolores Street, Columbus Avenue and Monterey Boulevard which are susceptible to the multiple-threat situation where a motorist may stop for a pedestrian or other cross street traffic but motorists in the adjacent lane may not. Speeds can also be a significant factor. Even streets with 25 MPH speed limits can be very intimidating for pedestrians to cross. At most of these locations, the SFMTA has installed continental crosswalks, advance signage, and other traffic control devices to highlight these pedestrian crossings. At this time, however, SFMTA staff believes signalization would improve the pedestrian right-of-way issues at these locations.

Folsom and Mabini was identified in the Central Corridor Plan as a location to be signalized to allow for a protected crossing of Folsom Street. It is supported by the Yerba Buena Consortium group. Russ and Howard was an intersection requested by the South of Market Community groups. It would complement the signal at Folsom and Russ installed as part of Contract 60 in 2012, using the same funding source. Russ Street connects the Victoria Draves Manalo Park and Bessie Carmichael Elementary School to the northern portion of the SOMA neighborhood grid.

The three locations along Fulton Street were identified as locations where pedestrian safety would be improved with a traffic signal. All three locations are at transit stops. The intersection at 37<sup>th</sup> and Fulton is adjacent to a senior citizen facility.

The intersection at 19<sup>th</sup> and Dolores is adjacent to Dolores Park and is located between two signalized intersections. It also flanks Dolores Park playground and is a key entrance into the park.

Columbus and Francisco is the only uncontrolled intersection along the Columbus Avenue corridor and where the Agency has received multiple requests in the past for STOP signs or signal control.

The three flashing beacon locations are being proposed at intersections where full signal control is not warranted but where beacons are appropriate devices: Monterey midblock crosswalk at Detroit, O'Shaughnessy midblock crosswalk at Malta and the California St crosswalk at Commonwealth. The California crosswalk will be paid for by private funds (California Pacific Medical Center).

## **Project Benefits**

New traffic signals provide the benefits of improved right-of-way assignment and access across major streets. All but one of the proposed signal locations currently have stop sign controls on the side street, while the major street is uncontrolled. Motorists from the side street have to stop and proceed only when there is a safe gap in traffic. Most importantly, pedestrians who cross the major street must also choose a gap in traffic in determining when to cross and depend on motorists to yield to them once they legally enter the crosswalk. New traffic signals will improve conditions for pedestrians by stopping traffic along the major street while allowing pedestrians and cross-traffic to proceed.

All new traffic signals the SFMTA installs will have Pedestrian Countdown Signals (PCS). PCSs have been effective in reducing the number of pedestrians remaining in the crosswalk at the beginning of the conflicting vehicle green light, thereby reducing the potential for vehicle-pedestrian conflicts. The countdown feature of the PCS is helpful for pedestrians to discern as to whether there is enough time left in a signal cycle to cross the intersection safely.

## **Community Support**

All the new signal locations were requested by the members of the public, some with specific interest from local district supervisors. The SFMTA has scheduled a public hearing in May 2015 to solicit input regarding the new signal locations and expect to receive overwhelming support.

## Implementation

The SFMTA Sustainable Streets Division will manage the scope of the detailed design including design review and contract preparation. The Department of Public Works' (DPW's) Bureau of Engineering or the SFMTA's Muni Engineering Division will manage the issuance and administration of the contract for construction by competitively bid contract.

current project status (e.g. expect more detail and certainty for a project about to enter construction than design); whether prior project phases are completed or expected to be Project Readiness: Project likely to need funding in fiscal year proposed. Factors to be considered include adequacy of scope, schedule, budget and funding plan relative to completed before beginning the next phase; and whether litigation, community opposition or other factors may significantly delay project.

Community Support: Project has clear and diverse community support and/or was it identified through a community-based planning process. An example of a community-Two points for a project with evidence of support from both neighborhood stakeholders and groups and citywide groups. based plan is a neighborhood transportation plan, but not a countywide plan or agency capital improvement program. Three points for a project in an adopted community based plan with evidence of diverse community support.

One point for a project with evidence of support from either neighborhood stakeholders and groups or citywide groups.

## Table 3 - Prioritization Criteria and Scoring Table New Signals and Sign (EP 31)

Time Sensitive Urgency: Project needs to proceed in proposed timeframe to enable construction coordination with another project (e.g., minimize costs and construction impacts); to support another funded or proposed project (e.g. new signal controllers need to be installed to support TEP implementation); or to meet timely use of funds deadlines associated with matching funds.

## New Equipment Subcategory:

Replaces asset at end of useful life: Replaces equipment that has reached the end of useful life per industry-accepted levels. Safety: Improves or mitigates a documented unsafe condition -- Improves worker safety.

Improves Project Delivery Rate: Supports accelerated project delivery (e.g., additional paint truck).

## All Other Subcategories:

Safety: (One point for each): Addresses demonstrated safety issue; reduces potential conflicts between modes; benefits users of multiple modes; and increases security.

Provides Benefits to Multiple Users: Projects receives one point each for addressing the needs of pedestrians, bicyclists, and/or transit users. Supports Transit First: Project improves transit service and reduces delay for transit vehicles at intersections controlled by traffic signals.

## SCHEDULE COORDINATION/NOTES

Provide project delivery milestones for each sub-project in the current request and a schedule for public involvement, if appropriate. For planning efforts, provide start/end dates by task here or in the scope (Tab 1). Describe coordination with other project schedules or external deadlines (e.g., obligation deadlines) that impact the project schedule, if relevant.

## FISCAL YEAR CASH FLOW DISTRIBUTION FOR CURRENT PROP K REQUEST

Use the table below to enter the proposed cash flow distribution schedule (e.g. the maximum Prop K/Prop AA funds that are guaranteed to be available for reimbursement each fiscal year) for the current request. If the schedule is more aggressive than the Prop K/Prop AA Strategic Plan and/or 5YPP, please explain in the text box below how cash flow for other projects and programs will be slowed down to accommodate the current request without exceeding annual cash flow assumptions made in the Strategic Plan.

Prop K Funds Requested:

See next page.				

## **Background and Scope**

The SFMTA requests Prop K funds in the amount of \$382,900 towards the construction phase of the Polk Street Traffic Signal Upgrade project. Federal Highway Safety Improvement Program (HSIP) funds are providing \$1,164,600 of the project budget. The total construction phase cost is \$1,547,500. The purpose of the project is to upgrade the traffic signals at nine intersections along Polk Street so that pedestrian countdown signals (PCS) can be added where they are currently missing. New accessible pedestrian signals (APS) will be added at five intersections. The signal visibility at each intersection will also be improved by better placement of poles and vehicular signal indications.

Polk Street is a Walkfirst High-Injury Corridor. The addition of PCS at these locations is consistent with the City's Vision Zero goals.

## Scope

The project scope is summarized in Table 1 below.

	Larger						# of
Cross	Signal	New	New	New	<b>Controller</b> /	New	Curb
Street	Heads	Poles	PCS	APS	Cabinet	Conduits	Ramps
Union	Х	Х	Х		Х	Х

Pacific	Х	Х	X	Х	Х	Х	
Jackson	Х	Х	X	Х	Х	Х	
Washington	Х	Х	X	Х	Х	Х	*
Clay	Х	Х	Х	Х	Х	Х	*
Sacramento	Х	Х	X		Х	Х	*
California	Х	Х	X		Х	Х	*
Post	Х	Х	X		Х	Х	*

## Table 1 – Polk Street Traffic Signal Upgrade

\* curb ramps to be installed by Polk Street Streetscape Project which will follow project

SFMTA and DPW Staff have been coordinating closely especially in light of the upcoming Polk Streetscape project. Based on this coordination effort, staff from both agencies jointly resolved to have all curb ramps at these nine project intersections be constructed as part of the streetscape project. The Streetscape project will go to construction 3-4 months after the start of this Polk Street project. There will be some overlap in the construction between the two phases and staff will work with DPW Construction Management to coordinate the work.

## Implementation

SFMTA's Sustainable Streets Division is managing the scope of the planning and detailed design including design review and contract preparation. The Department of Public Works' (DPW's) Bureau of Engineering will manage the issuance and administration of the contract for construction by competitively bid contract.

## **Construction Budget**

The total amount of HSIP funds for the construction phase of this project is \$1,164,600. The minimum required match is \$129,400 (10%).

However, because the cost is estimated to be \$1,547,500, the project needs \$382,900 in local funds to be complete. We are thus requesting over and above the required match. Federal fund programs like HSIP also cap the amount that can be spent on construction engineering and inspection at 10% of contract costs, where typical City projects is usually in the range of 20-25%.

Project Closeout (i.e., final expenses incurred)			1	2017/18

## SCHEDULE COORDINATION/NOTES

Provide project delivery milestones for each sub-project in the current request and a schedule for public involvement, if appropriate. For planning efforts, provide start/end dates by task here or in the scope (Tab 1). Describe coordination with other project schedules or external deadlines (e.g., obligation deadlines) that impact the project schedule, if relevant.

## MAJOR LINE ITEM BUDGET

. Provide a major line item budget, with subtotals by task and phase. More detail is required the farther along the project is in the development phase. Planning studies should provide task-level budget information.

2. Requests for project development should include preliminary estimates for later phases such as construction.

4. For work to be performed by agency staff rather than consultants, provide base rate, overhead multiplier, and fully burdened rates by position with FTE (full-time equivalent) ratio. A sample 3. Support costs and contingencies should be called out in each phase, as appropriate. Provide both dollar amounts and % (e.g. % of construction) for support costs and contingencies. format is provided below.

5. For construction costs, please include budget details. A sample format is provided below. Please note if work will be performed through a contract.

### FISCAL YEAR CASH FLOW DISTRIBUTION FOR CURRENT PROP K REQUEST

Use the table below to enter the proposed cash flow distribution schedule (e.g. the maximum Prop K/Prop AA funds that are guaranteed to be available for reimbursement each fiscal year) for the current request. If the schedule is more aggressive than the Prop K/Prop AA Strategic Plan and/or 5YPP, please explain in the text box below how cash flow for other projects and programs will be slowed down to accommodate the current request without exceeding annual cash flow assumptions made in the Strategic Plan.

Polk Street Traffic Signal Upgrade

### VICINITY/ PROJECT MAP

The proposed project is located in the northwestern part of San Francisco along Polk Street. Polk Street is a neighborhood street with many small local businesses, restaurants, and small hotels. Many of the people (50%) typically walk to Polk Street. It is relatively flat which makes the street easy and more attractive to walk, unlike many of their neighboring parallel streets. There are two elementary schools nearby, including Redding Elementary School and Tenderloin Elementary School. Muni's 19 Polk line also runs along Polk Street.

### FOOTNOTES:

<sup>1</sup> 5YPP Amendment to fully fund 7th Avenue and Lincoln Way Intersection Improvements (Resolution 15-046, 03/24/2015):

Traffic Signal Upgrades (15 Locations): Reduced by \$95,476 in FY 2014/15 design funds. 7th Avenue and Lincoln Way is one of the 15 locations covered by this placeholder.

7th Avenue and Lincoln Way: Added project with \$95,476 for construction.

<sup>2</sup> 5YPP Amendment to reprogram \$382,900 from the PS&E phase to the construction phase of the Polk Street Traffic Signal Upgrade project (Resolution XX-XXX, xx/xx/2015). Design fully funded throught Federal HSIP grant and SFMTA operating funds.

schedule. If there are prior allocations for	to allow Authority staff to evaluate the reasonableness of the proposed the same project, provide an update on progress. Describe any outreac be provided in a separate Word file. Maps, drawings, etc. should be pro- nal worksheets.	h activities		

Project sponsors shall provide a brief explanation of how the project was prioritized for funding, highlighting: 1) project benefits, 2) level of public input into the prioritization process, and 3) whether the project is included in any adopted plans, including Prop K/Prop AA 5-Year Prioritization Program (5YPPs). Justify any inconsistencies with the adopted Prop K/Prop AA Strategic Plans and/or relevant 5YPPs.

Indicate whether work is to be performed by outside consultants and/or by force account.

The San Francisco Municipal Transportation Agency (SFMTA) requests Prop K Neighborhood Transportation Improvement Program (NTIP) capital funding in the amount of \$100,000 for conceptual engineering for "the Hairball," the intersection of Cesar Chavez, Bayshore, Portrero, and US Highway 101. This intersection includes portions of Bike Routes 60 and 25 (where bikes and car share the roadway on Cesar Chavez Street and Bayshore Boulevard respectively), as well as a dedicated off-street bicycle path connecting Cesar Chavez Street under Highway 101. A map and photo showing the routes and dedicated bicycle path is included in this request. The scope of work continues on the next page.

The Transportation Authority's Neighborhood Transportation Improvement Program (NTIP) is intended to strengthen project pipelines and advance the delivery of community-supported neighborhood-scale projects, especially in Communities of Concern and other neighborhoods with high unmet needs. NTIP capital funding is intended to advance one small and one mid-sized neighborhood scale project toward implementation in the next five years in each district.

### San Francisco County Transportation Authority Proposition K Sales Tax Program Allocation Request

### Background

In 2012, the San Francisco Planning Department published the Cesar Chavez East Community Design Plan, which includes safety improvement recommendations for the Bayshore/Cesar Chavez/Potrero intersection (also known as the Hairball). In the project area, Cesar Chavez Street, Bayshore Boulevard and Potrero Avenue change from city streets to a complex arrangement of bridges and ramps linking the three streets with Highway 101. The intersection is built in three levels, with pedestrian and bicycle circulation generally restricted to the middle and ground levels, while vehicles use all three levels. While limited in some respects, the pedestrian and bicycle circulation network allows connections between Cesar Chavez Street, Bayshore Boulevard and Potrero Avenue that are not possible by vehicle and has the potential to provide a high level of connectivity to non-motorized users within the framework of the existing highly complex intersection structure. The SFMTA is requesting \$100,000 in Neighborhood Transportation Improvement Program capital funds to finalize conceptual designs for several safety improvement recommendations.

### Scope

The scope of work included in this project builds upon recommendations from the Cesar Chavez East Community Design Plan and spot improvement prioritization from an SFMTA-sponsored workshop in early 2014. This project will further spot improvements at two key intersection sites—Segment F and Segment G as shown on the map attached to this allocation request —and will also result in a lighting plan for the intersection.

Segment F is a path carrying people traveling eastbound on foot and bicycle through an undeveloped city-owned lot. The existing path is approximately six feet wide, which is too narrow for a shared use path for one-way bicycle traffic and two-way pedestrian traffic. To facilitate future improvements along Segment F, San Francisco Public Works (SFPW) will survey the segment area and assess the possibility of providing a wider multi-use path or separate paths for pedestrians and cyclists. The SFMTA will create conceptual designs (20% design drawings) based on SFPW's work.

Segment G carries people on foot and on bicycle traveling eastbound down a steep grade under the Highway 101 southbound on-ramp. The path descends a flight of stairs while a parallel ramp which accommodates people on bicycles may be too steep for many users. (The grade is currently 30 percent. According to FHWA guidelines, grade should be 10 percent.) The overhead on-ramp structure provides narrow clearance of approximately eight feet. SFPW will survey the area and design a more accessible path for pedestrians and cyclists to negotiate the elevation change. The SFMTA will create conceptual designs (20% design drawings) based on SFPW's work.

Lighting is an important factor in perceived and actual personal safety, and many users of the intersection consider the lighting of pedestrian and cycling paths inadequate. Paths often appear shadowy and unsafe, particularly where they diverge from the roadway or are overshadowed by bridges and ramps. Light fixture placement seems haphazard, and broken lights are not always fixed

### San Francisco County Transportation Authority Proposition K Sales Tax Program Allocation Request

promptly. SFPW will develop a lighting plan for the interchange area that addresses the specific needs of pedestrians, cyclists and motorists based on current guidelines and standards.

The SFMTA tasks include project management, conceptual designs for bicycle and pedestrian improvements, and coordinating the project with Caltrans and SFPW. SFPW tasks include area surveys developing an area-wide lighting plan that addresses specific needs for pedestrians, cyclists and motorists. In coordination with Segment F and Segment G improvements, SFMTA will conduct stakeholder outreach, working with all necessary City and State entities. SFMTA will also conduct a walking and bike audit of the areas under study in order to identify major concerns for pedestrians and bicyclists.

### Prioritization

The Cesar Chavez East Community Design Plan prioritizes the Hairball as an important pedestrian and bicycle connector in the area, providing east-west connections on Cesar Chavez and northsouth connections on Potrero and Bayshore.

Upgrading the bicycle and pedestrian facilities on Cesar Chavez, Bayshore and Potrero are Vision Zero projects. Vision Zero is a San Francisco policy intended to achieve the following goals by 2024:

- Eliminate all traffic deaths
- Reduce severe and fatal injury inequities across neighborhoods, transportation modes, and populations

## MAJOR LINE ITEM BUDGET

. Provide a major line item budget, with subtotals by task and phase. More detail is required the farther along the project is in the development phase. Planning studies should provide task-level budget information.

2. Requests for project development should include preliminary estimates for later phases such as construction.

3. Support costs and contingencies should be called out in each phase, as appropriate. Provide both dollar amounts and % (e.g. % of construction) for support costs and contingencies.

4. For work to be performed by agency staff rather than consultants, provide base rate, overhead multiplier, and fully burdened rates by position with FTE (full-time equivalent) ratio. A sample format is provided below.

5. For construction costs, please include budget details. A sample format is provided below. Please note if work will be performed through a contract.

6. For any contract work, please provide the LBE/SBE/DBE goals as applicable to the contract.

SCOPE Sufficient scope detail should be provided to allow Authority staff to evaluate the reasonableness of the proposed budget and schedule. If		
Project sponsors shall provide a brief explanation of how the project was prioritized for funding, highlighting: 1) project benefits, 2) level of public input into the prioritization process, and 3) whether the project is included in any adopted plans, including Prop K/Prop AA 5-Year Prioritization Program (5YPPs). Justify any inconsistencies with the adopted Prop K/Prop AA Strategic Plans and/or relevant 5YPPs. Indicate whether work is to be performed by outside consultants and/or by force account.		
The Transportation Authority's Neighborhood Transportation Improvement Program (NTIP) was developed to build community awareness of, and capacity to provide input to, the transportation planning process and to advance delivery of community supported neighborhood-scale projects.		
The District 2 NTIP Planning Project was developed in response to input from Supervisor Farrell's office and community concerns in District 2. Project deliverables and recommendations will respond to Supervisor and community concerns. The full scope of work begins on the next page.		

### San Francisco County Transportation Authority Proposition K Sales Tax Program Allocation Request Form Scope of Work

### **Background and Purpose**

The SFCTA requests \$100,000 in Prop K Neighborhood Transportation Improvement Program (NTIP) planning funds, which are proposed to be matched with \$25,000 in funds from Commissioner Farrell's office, to engage the community, Supervisor Farrell's Office, and other relevant stakeholders in a planning effort that evaluates potential options for managing access on the 1000 block of Lombard Street. This request includes \$10,000 for the San Francisco Municipal Transportation Agency (SFMTA) to support SFMTA's involvement in the proposed study. The purpose of the effort is to identify and evaluate a range of options to manage visitor access and circulation on the "Crooked Street", while maintaining the character of the street, managing vehicle and pedestrian congestion, avoiding spillover effects into adjacent streets, and other goals.

### **Tasks and Deliverables**

The task items described below represent the basic outline of a planning study, undertaken by the SFCTA, requested by Commissioner Farrell, to address traffic and congestion issues along the 1000 Block of Lombard Street and in the surrounding neighborhood. This outline proposes a scope for a planning study, with an estimated cost (see attached budget) and timeline (see attached schedule) for the preparation of the study.

### Task 1: Existing Conditions and Study Need

- Review prior data gathering efforts. Where appropriate, gather multimodal data, collision data, and community input in the study area to illustrate the safety and vehicular circulation issues. Assess any data gaps and consider additional data collection where necessary.
- Visit the site to experience firsthand the issues raised by the community.
- Summarize past studies and/or pilots to manage access to the "Crooked Street"
  - Copies of any past studies and/or pilots to be appended
- Undertake at least one (1) public community meeting to catalogue concerns and gather input on study purpose and goals, including the relative importance of various preliminary goals, and on draft metrics for evaluating alternatives against the goals.<sup>1</sup> *Deliverable: summary notes from community meeting*
- Participate in at least one (1) Lombard Street working group meeting to engage with stakeholders from SFMTA (various divisions including traffic, transit, sustainable streets, enforcement/PCOs), SFPW, OEWD, SF Travel, and others. Additional individual or group stakeholder contact may be organized as needed. *Deliverable: summary notes from stakeholder meeting*
- This scope assumes that the Supervisor's office will provide contacts and introductions for appropriate community members or specific stakeholder groups (other than public sector stakeholders) for interview. Stakeholder group interviews may be facilitated via SFCTA staff and/or consultant attendance at existing community meetings.

<sup>&</sup>lt;sup>1</sup> Potential work item for on-call consultant with oversight by staff

### San Francisco County Transportation Authority Proposition K Sales Tax Program Allocation Request Form Scope of Work

### Task 2: Refine Study Purpose and Goals

- Refine study purpose, based on input from community and stakeholder meetings
  - Manage visitor access and circulation on Lombard Street to ensure a livable environment and safety for all users.
- Synthesize information from Section 1 to clarify goals in pursuit of the study purpose, based on input from community and stakeholder meetings
  - o Preliminary goals include:
    - Managing or reducing pedestrian congestion
    - Ensure traffic safety
    - Maintaining livability and character of the "Crooked Street"
    - Preserving tourism
    - Implementing a financially self-sustaining solution
    - Avoiding or mitigating spillover impacts to neighboring streets/areas
- Identify evaluation metrics for alternatives reflecting the study purpose and goals, and the input from community and stakeholder meetings. *Deliverable: final study purpose statement, final list of prioritized goals, evaluation metrics.*

### Task 3: Alternatives Development

- Review case studies/best practices:
  - Potential case study sites may include Muir Woods, Charleston Historic District, Parc Guell, or other sensitive sites
- •
- 0
- Identify alternatives, including but not limited to:
  - o Managed Access Alternative
  - o Limited Access Alternative
  - Car Free Alternative
- Identify potential actions/solutions for each alternative<sup>2</sup>:
  - o Design an Access Management Program
  - Estimated order-of-magnitude capital and operating costs and potential funding sources
  - Identify funding options to pay for program, particularly on-going O&M associated with PCOs or other services
  - Consider cost sharing with other visitor management programs, such as the Fisherman's Wharf Ambassador Program

<sup>&</sup>lt;sup>2</sup> May use on-call consultant hours to help develop scenarios for each Alternative

## San Francisco County Transportation Authority Proposition K Sales Tax Program Allocation Request Form Scope of Work

- o Consider legislation, governance, administration, means of enforcement, surrounding neighborhood impacts, other challenges
- 0
- Undertake community and stakeholder outreach to present and gather feedback on Alternatives<sup>3</sup>
  - Conduct at least one (1) public outreach effort that will focus on sharing alternatives and gathering community feedback. *Deliverable: summary notes from community meeting*
  - Participate in at least two (2) Lombard Street working group meeting, focusing on developing alternatives in concert with public stakeholders and others. *Deliverable: summary notes from stakeholder meeting*

Task 4: Key Findings and Recommendations

- Evaluate alternatives against metrics, purpose, and goals developed in Task 2.
- Synthesize recommendations based on community and stakeholder input during the alternative development process
  - Undertake community and stakeholder outreach to present and gather feedback on Alternatives<sup>4</sup>
    - Conduct at least one (1) public outreach effort that will focus on seeking community support for preferred alternative(s). *Deliverable: summary notes from community meeting*
    - Participate in at least one (1) Lombard Street working group meeting, focusing on selecting preferred alternative(s). *Deliverable: summary notes from stakeholder meeting*
- Identify implementation and next steps for the staff-recommended Alternative

Final Deliverables:

- Published final report (preceded by one draft version of the report)
- Presentation materials for CAC/Board/SFMTA Policy and Governance Committee meetings

## SCHEDULE COORDINATION/NOTES

Provide project delivery milestones for each sub-project in the current request and a schedule for public involvement, if appropriate. For planning efforts, provide start/end dates by task here or in the scope (Tab 1). Describe coordination with other project schedules or external deadlines (e.g., obligation deadlines) that impact the project schedule, if relevant.

See attached detailed project schedule.

# **Study Timeline - Managing Access to the "Crooked Street"** Prepared in April 2015

Timeline for Planning Study	Estimated Date for Completion
Task 1: Existing Conditions and Study Need	
Gather and review existing data	May 2015
Identify additional data collection requirements & select on-call consultant to	May 2015
perform work	May 2015
Contract with on-call consultant to perform data collection	May / early June 2015
Participate in one (1) Lombard Street working group meeting	June/July 2015
Conduct one (1) public meeting	June/July 2015
Visualize data	August 2015
Prepare draft write-up	August 2015
Task 2: Study Purpose/Goals	
Refine study purpose and goals, based on input from Task 1	July 2015
Develop evaluation metrics	July 2015
Prepare draft write-up	July 2015
Task 3: Alternatives Development	
Info gather / research	Summer 2015
Review case studies / best practices	Summer 2015
Conduct informational interviews with up to four (4) select City staff members	Summer 2015
on Summer 2014 pilot closure	Summer 2015
Undertake community outreach at two (2) community meetings	Fall 2015
Participate in two (2) Lombard Street working group meeting	Fall 2015
Prepare draft write-up	October 2015
Task 4: Key Findings and Recommendations	
Evaluate alternatives against metrics, purpose, and goals developed in Task 2	October 2015
Synthesize recommendations and findings; evaluate alternatives against metrics	
Identify implementation and next steps	October 2015
Report Production	
Draft report presented to CAC and Board, SFMTA Board or Committee	November 2015
Final report presented to CAC and Board	December 2015

## MAJOR LINE ITEM BUDGET

1. Provide a major line item budget, with subtotals by task and phase. More detail is required the farther along the project is in the development phase. Planning studies should provide task-level budget information.

2. Requests for project development should include preliminary estimates for later phases such as construction.

3. Support costs and contingencies should be called out in each phase, as appropriate. Provide both dollar amounts and % (e.g. % of construction) for support costs and contingencies.

4. For work to be performed by agency staff rather than consultants, provide base rate, overhead multiplier, and fully burdened rates by position with FTE (full-time equivalent) ratio. A sample format is provided below.

5. For construction costs, please include budget details. A sample format is provided below. Please note if work will be performed through a contract.

6. For any contract work, please provide the LBE/SBE/DBE goals as applicable to the contract.

#### TOTAL BY AGENCY

SFCTA	\$ 115,000
SFMTA	\$ 10,000
TOTAL	\$ 125,000

#### **Budget by Task**

Task 1: Existing Conditions and Study Need	\$	19,367
Task 2: Study Purpose/Goals	\$	3,740
Task 3: Alternatives Development	\$	19,870
Task 4: Key Findings and Recommendations	\$	7,197
Report Production / Meetings	\$	15,238
External Parties (consultants, legal review, outreach,		
etc.)	\$	40,000
Contingency	\$	20,000
TOTAL:	\$	125,413
TOTAL, ROUNDED	Ŷ	125,000

FISCAL YEAR CASH FLOW DISTRIBUTION FOR CURRENT PROP K REQUEST

Use the table below to enter the proposed cash flow distribution schedule (e.g. the maximum Prop K/Prop AA funds that are guaranteed to be available for reimbursement each fiscal year) for the current request. If the schedule is more aggressive than the Prop K/Prop AA Strategic Plan and/or 5YPP, please explain in the text box below how cash flow for other projects and programs will be slowed down to accommodate the current request without exceeding annual cash flow assumptions made in the Strategic Plan.
