San Francisco County Transportation Authority

State Legislation – June 2018

To view documents associated with the bill, click the bill number link.

Staff is recommending two new support positions on Senate Bill (SB) 1014 (Skinner) and SB 1328 (Beall), as shown in **Table 1**. **Table 2** provides updates on two bills on which the Transportation Authority has previously taken a position this session: Assembly Bill (AB) 2865 (Chiu) and AB 3124 (Bloom). **Table 3** indicates the status of all bills on which the Board has already taken a position this session.

| Recommen ded Positions | Bill # Author | Title and Description | |
|------------------------------|------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
| Support | <u>SB 1014</u> <u>Skinner</u> D | Zero-emission vehicles. Would require the Public Utilities Commission to establish the California Cle Miles Standard Program for zero-emission vehicles used to prove prearranged transportation services for compensation from transportation network companies (TNCs) with the goal to increase the percentage passenger miles provided by zero-emission vehicles used on behalf of TN so that 20% of the passenger miles are provided by zero-emission vehicles December 31, 2023, 50% by December 31, 2026 and 100% by January 1, 202 The City's State Legislation Committee adopted a support position on this b in May. | |
| | | The Transportation Authority Board adopted a Watch position on this bill in May. We are now recommending a support position for this bill given the recent amendments which removed the incentive portion of the program. | |
| Support | <u>SB 1328</u> <u>Beall</u> D | Mileage-based road usage fee. Current law required the Chair of the California Transportation Commic create a Road Usage Charge Technical Advisory Committee (TAC consultation with the Secretary of the Transportation Agency. The purpor the TAC was to guide the development and evaluation of a pilot progra assess the potential for mileage-based revenue collection as an alternation the gas tax system. The pilot program was completed last summer. | |
| | | This bill would extend the TAC's operation an additional four years through January 1, 2023, and would require the TAC to assess the potential for mileage- based revenue collection for California's roads and highways as an alternative to the gas tax system. We agree that further research and outreach work is needed to determine whether a road charge may be a viable replacement for the gas tax for transportation funding. | |

| Adopted | Bill # | Title and Update | |
|----------------------|--------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
| Positions | Author | | |
| Support / Sponsor | AB 2865 Chiu D | High-occupancy toll lanes: Santa Clara Valley Transportation Authority (VTA). If the Board votes to approve a managed lanes (e.g. carpool/transit lane) project on US-101 and I-280 north of the divide in San Francisco, this bill would give the Transportation Authority the option of asking the Santa Clara Valley Transportation Authority to operate the lanes on San Francisco's behalf. San Mateo has similar authority and the intent is to allow a single, coordinated congestion management approach for the 101 corridor that extends from Santa Clara to San Francisco. Revenues would be spent according to a Board-approved expenditure plan on transportation projects that benefit transit riders, carpoolers, and drivers in the corridor. | |
| | | The bill passed out of the Assembly in May, and we anticipate it will next be heard at the Senate Transportation and Housing Committee in mid-June. We have requested an amendment to the bill to add a new section that would give the Transportation Authority a second option to ask the Bay Area Infrastructure Financing Authority to operate the lanes on San Francisco's behalf. This amendment would address Metropolitan Transportation Commission staff's interest in having the Board consider joining its regional express lane network while still requiring revenues to be spent according to a Board-approved expenditure plan. Under the new language, if the Board approves a managed lanes project at a later date, it would then have the ability to negotiate with the potential operators and select the preferred option. | |
| Support | AB 3124 Bloom D | Vehicles: length limitations: buses: bicycle transportation devices This bill has passed both houses and was approved by the Governor on June 1. The SFMTA is a sponsor of this bill, which would allow transit agencies to increase the capacity of front-mounted bike racks from two bikes to three. The City's State Legislation Committee and the Metropolitan Transportation Commission have also taken a position of support. | |
