| schedule. If there are prior allocations for the same project, provide an update on progress. Describe any outreach activities included in the scope. Long scopes may be provided in a separate Word file. Maps, drawings, etc. should be provided on Worksheet 7-Maps.or by inserting additional worksheets. Project sponsors shall provide a brief explanation of how the project was prioritized for funding, highlighting: 1) project benefits, 2) level of public input into the prioritization process, and 3) whether the project is included in any adopted plans, including Prop K/Prop AA 5-Year Prioritization Program (5YPPs). Justify any inconsistencies with the adopted Prop K/Prop AA Strategic Plans and/or relevant 5YPPs. Indicate whether work is to be performed by outside consultants and/or by force account. | | | | | | | | |
| Scope of work begins on next page. | | | | | | | | |

Background

Shared roadway bicycle markings, or "sharrows," are a type of pavement marking placed within a traffic lane to alert drivers that bicyclists share the traffic lane and to help reduce the chance of bicyclists colliding into the open doors of parked vehicles. Currently, sharrows are used throughout San Francisco on many bicycle routes.

Broadly speaking, sharrows are a relatively low-cost improvement to increase safety on bicycle routes and on streets with wide curb lanes that are not scheduled for major improvements in the near term. A San Francisco Municipal Transportation Agency (SFMTA)-led study on the effectiveness of sharrows titled "San Francisco's Shared Lane Pavement Markings: Improving Bicycle Safety" found the following meaningful benefits after the installation of sharrows:

- Bicyclists rode further away from the door zone;
- Motorists shifted to the left and gave more room when passing bicyclists;
- Fewer bicyclists rode on the sidewalk; and
- Fewer bicyclists rode the wrong way on the street.

Scope

The SFMTA requests \$256,100 in Prop K funds to install an estimated 1,350 new shared roadway markings on approximately 16 miles of San Francisco Bike Network streets identified in the 2009 San Francisco Bicycle Plan that do not or will not have other facilities such as bicycle lanes or bicycle paths installed in the near future. There is an outstanding list of sharrows at 52 locations identified in the plan to be implemented (see list of locations attached to this request). To date, the SFMTA has installed 74 miles of sharrow markings identified in the San Francisco Bicycle Plan (funded with prior Prop K, Transportation Fund for Clean Air County Program Manager funds, and Transportation Enhancement/ State Transportation Improvement Program funds programmed by the Transportation Authority).

When Livable Streets staff submits sharrow work orders to the SFMTA Paint Shop, the SFMTA standard operating procedures require the submission of a striping drawing approved by a section engineer with the work order that indicates to paint crews where the new sharrows will be placed. In cases where there is no existing traffic striping, no striping drawing exists and one must be created. This allocation will fund the design, environmental clearance (i.e., verification that proposed sharrows are consistent with the Bicycle Plan EIR), and construction of sharrows to be installed by the end of December 2015.

All construction work will be completed by force account with the SFMTA Paint Shop.

Prioritization

The SFMTA prioritizes requests for new sharrows (i.e., those not identified in the San Francisco Bicycle Plan) based on the existing backlog of requested sharrow locations along with new requests submitted through elected officials and 311. Looking ahead, work orders will be grouped by physical proximity to maximize the efficiency of their installation by paint shop crews. Sharrows implemented with this request are different than those to be funded Prop B Streets Bond funded sharrows, where completion is contingent on DPW's paving schedule.

This funding request requires an amendment to the Bicycle Safety and Circulation 5-Year Prioritization Program. This project will be funded by \$118,000 programmed to Sharrows in Fiscal Year 14/15 and \$138,100 programmed to the Bicycle Network Expansion and Upgrades construction phase project in Fiscal Year 14/15, which will not be needed this fiscal year.

SCHEDULE COORDINATION/NOTES

Provide project delivery milestones for each sub-project in the current request and a schedule for public involvement, if appropriate. For planning efforts, provide start/end dates by task here or in the scope (Tab 1). Describe coordination with other project schedules or external deadlines (e.g., obligation deadlines) that impact the project schedule, if relevant.

To facilitate a steady stream of work for the SFMTA Paint Shop crew installing sharrows, the final environmental approval and design engineering are done concurrently prior to construction.

On an ongoing basis, SFMTA staff develops approved striping drawings and work orders for a month's worth of construction work. The list of installation locations along with the work orders are submitted to the Planning Department's Environmental Planning unit to verify consistency with the programmatic clearance accorded to sharrows in the San Francisco Bicycle Plan Environmental Impact Report. Following approval, work orders are submitted to the Paint Shop for scheduling and installation.

San Francisco County Transportation Authority Proposition K Sales Tax Program Allocation Request Form

MAJOR LINE ITEM BUDGET

1. Provide a major line item budget, with subtotals by task and phase. More detail is required the farther along the project is in the development phase. Planning studies should provide task-level budget information.

2. Requests for project development should include preliminary estimates for later phases such as construction.

3. Support costs and contingencies should be called out in each phase, as appropriate. Provide both dollar amounts and % (e.g. % of construction) for support costs and contingencies. 4. For work to be performed by agency staff rather than consultants, provide base rate, overhead multiplier, and fully burdened rates by position with FTE (full-time equivalent) ratio. A

sample format is provided below.

5. For construction costs, please include budget details. A sample format is provided below. Please note if work will be performed through a contract.

6. For any contract work, please provide the LBE/SBE/DBE goals as applicable to the contract.

FISCAL YEAR CASH FLOW DISTRIBUTION FOR CURRENT PROP K REQUEST

Use the table below to enter the proposed cash flow distribution schedule (e.g. the maximum Prop K/Prop AA funds that are guaranteed to be available for reimbursement each fiscal year) for the current request. If the schedule is more aggressive than the Prop K/Prop AA Strategic Plan and/or 5YPP, please explain in the text box below how cash flow for other projects and programs will be slowed down to accommodate the current request without exceeding annual cash flow assumptions made in the Strategic Plan.

| A detailed scope of work is attached. | | |

Approximately 50% of the work will be completed by outside consultants and 50% by SFCTA staff.

SCOPE OF WORK: TREASURE ISLAND MOBILITY MANAGEMENT PROGRAM PHASE 1

TIMMA Overview and Background

In June 2011, the San Francisco Board of Supervisors (BOS) voted to approve various pieces of legislation authorizing the Treasure Island/Yerba Buena Island Development Project (Development Project), entered into a Disposition and Development Agreement, and upheld the certification of the Development Project's Environmental Impact Report. The Development Project includes 8,000 new housing units (at least 25% below market rate), 207,000 square feet of retail, 244,000 square feet of adaptive reuse, up to 500 hotel rooms, up to 100,000 square feet of office space and over 300 acres of public open space. The Treasure Island Transportation Implementation Plan (Transportation Plan), adopted as part of the development projects' approvals, will allow development to occur without further straining the congested Bay Bridge travel corridor, and while simultaneously advancing sustainability in the region.

The centerpiece of this innovative approach to mobility is an integrated and multimodal congestion pricing demonstration program that applies motorist user fees to reduce the traffic impacts of the Development Project. The congestion fee, which is authorized under previous legislation (Assembly Bill (AB) 981, signed in 2008), in combination with parking and transit pass revenues, would help fund a comprehensive suite of transportation services, including: frequent ferry and bus service to San Francisco and Oakland, a free island circulator shuttle, bikeshare; and other cycling and pedestrian amenities. Other demand management elements include unbundled parking, required purchase of transit vouchers for residents, and pricing of all non-resident parking on Treasure Island. Implementation of congestion pricing is intended to occur concurrently with the occupancy of the first 1,000 housing units on Treasure Island.

Under AB 981, these transportation services and policies (Transportation Program) are to be implemented by a Treasure Island Mobility Management Agency (TIMMA), which is to be designated by the BOS, on the recommendation of the Treasure Island Development Authority (TIDA). On April 1, 2014, the San Francisco Board of Supervisors adopted a resolution designating the San Francisco County Transportation Authority (Transportation Authority) as the TIMMA to implement elements of the Transportation Plan in support of the Development Project.

On September 19, 2014 Governor Brown signed AB 141 (Ammiano), establishing TIMMA as its own agency separate from the Transportation Authority.

TIMMA Purpose

The purpose of the TIMMA is to implement the comprehensive and integrated Transportation Program outlined in the Transportation Plan to manage travel demand on Treasure Island as development occurs. As described in the enabling legislation, AB 981, the goals of a Treasure Island Mobility Management Program are to:

- Develop a comprehensive set of Transportation Demand Management (TDM) programs to encourage and facilitate transit use and to minimize the environmental and other impacts of private motor vehicles traveling to, from, and on Treasure Island.
- Manage Treasure Island-related transportation in a sustainable manner, with the goal of reducing vehicle miles traveled and minimizing carbon emissions and impacts on air and water quality.
- Create a flexible institutional structure that can set parking and congestion pricing rates, monitor the performance of the transportation program, collect revenues, and direct revenues to transportation services and programs serving Treasure Island.
- Promote multimodal access to, from, and on Treasure Island by a wide range of local, regional, and statewide visitors by providing a reliable source of funding for transportation services and programs serving Treasure Island that will include bus transit service provided by the San Francisco Municipal Transportation Agency (SFMTA) and ferry service.

Phase 1 Scope of Work

To carry out pre-implementation planning on TIMMA and TIDA's behalf, the Transportation Authority Board and TIDA Board authorized an operating Memoranda of Agreement (MOA) between the Transportation Authority and TIDA in 2011, through Resolution 12-25, and in 2012, through Resolution 13-01. In each of those fiscal years, Transportation Authority staff carried out a scope of pre-implementation work funded by TIDA, including successful grant applications to the Federal Highway Administration and Metropolitan Transportation Commission (MTC) for planning and preliminary engineering work. With the Fiscal Year 2013/14 work program, authorized through Resolution 14-53, the Transportation Authority initiated Phase 1 policy and financial analysis, funded by the two grant awards: a FHWA Value Pricing Pilot Program (VPPP) and a MTC Priority Development Area (PDA) planning grant, matched by a TIDA contribution.

Phase 1 of the Treasure Island Mobility Management Program is a pre-implementation phase of work that includes three elements:

1. Governance, Administration, and Outreach

2. Planning

3. Preliminary Engineering

The scope, status, and expected completion date of Phase 1 activities within each element are described below.

Element 1: Governance, Administration, and Outreach

In Phase 1, the Governance element will include:

- Legally forming the TIMMA as a new agency, including agency designation, clean-up legislation, code adoption, and agency initiation activities (organizational structure, staffing and budgeting), and meetings of the TIMMA Board.
- Ongoing Program Management activities, including work plan development, funding advocacy, budgeting, staff management, oversight, and communications.
- Agency stakeholder and public outreach, including: regular meetings with the TIDA Board, Community Advisory Board, and SFCTA CAC (if applicable) and Board; and establishment and regular meetings of a project Technical Advisory Committee (TAC).
- Policy agreements with partner and future operating agencies.

Task 1.1 - Project Management

Start Date: FY 2013/14 Q1 End Date: ongoing

This task includes the development of the project work plan, schedule and budget for all phases of the project. The overall project schedule will reflect deliverables and key milestones for all organizational, planning and engineering tasks associated with the TIMMA Program and will include key milestones associated with the overall Treasure Island Development and related infrastructure improvements. This task also includes all team check-in and status meetings required to review the project/program status and deliverables.

<u>Deliverables</u>: Project Work Plan, Schedule and Budget (ongoing) Weekly/Monthly Team Meetings as required

Task 1.2 – Agency Operation

Start Date: FY 2013/14 Q1 End Date: ongoing

The purpose of this task is to obtain the necessary approvals by the San Francisco Board of Supervisors to designate the SFCTA as the Treasure Island Mobility Management Agency and clean-up legislation to establish TIMMA as a legal entity separate from the Transportation Authority. Now that these tasks are complete, follow-up activities include: development of an agency implementation plan and organizational structure; rules of order; financial policies; and annual operating budgets.

<u>Deliverables:</u>

Action to designate SFCTA as TIMMA (complete FY2014/15 Q1) Draft TIMMA Rules of Order, Financial Policies, Fiscal Year 2015/16 budget, and annual operational needs (Underway; target complete date FY2014/15 Q4)

Task 1.3 - Public and Stakeholder Outreach

Start Date: FY 2013/14 Q1 End Date: ongoing

This task includes all activities related to public and partner stakeholder outreach including development of outreach and educational materials. Outreach activities will include community meetings, development of educational materials and a program website. Educational briefing will be made to partners and stakeholders including the CAC, the TIDA Board and partner agency Boards. A TAC has been established to review all planning and development deliverables and to provide feedback on the program development. TAC members include FHWA, Caltrans, MTC and the Bay Area Toll Authority (BATA), the Association of Bay Area Governments (ABAG), the San Francisco Municipal Transportation Agency (SFMTA), AC Transit, the Water Emergency Transportation Authority (WETA), TIDA, and Treasure Island Community Development (TICD).

<u>Deliverables:</u> Communications collateral materials (website, fact sheet) (Complete) Community and Partner Stakeholder Meetings/Presentations TAC Roster (Complete) Quarterly TAC meetings

Task 1.4 - Stakeholder Agreements

Start Date: FY 2014/15 Q1 End Date: ongoing

This task includes drafting policy (pre-operational) agreements with multiple partner agencies including transit operators, BATA/MTC, and potentially Caltrans. This task will include meetings with partners to discuss requirements of the initial Memorandum of Agreement that will be executed with TIMMA.

Deliverables:

Partner Meetings, Draft or Adopted Memoranda of Agreement

Element 2: Planning

This element of the Program will complete the planning work necessary to develop Program policies and complete the financial feasibility analysis for the Program.

Task 2.1-Mobility Management Program Description and Policies

Start Date: FY2013/14 Q2 End Date: FY2014/15 Q4

AB 981 and the Transportation Program identify a package of mobility and demand management strategies that will be implemented as part the Development Project, including enhanced transit services and variable user fees in the form of a congestion toll and parking fees. The purpose of this task is to draft and refine the description of these core pricing strategies and to develop a physical project description. The Project Description will document the assumptions about basic system requirements

needed to implement the pricing strategies including: physical infrastructure requirements, toll collection system(s), parking pricing system and back office and customer service center requirements. It will also identify potential initial pricing fee structures for both the road toll and parking pricing.

Although AB 981 and the Transportation Program authorized the assessment of a congestion fee (as well as other congestion pricing strategies) and described its general parameters, advanced system planning and financial analyses requires more detailed specifications of pricing structures, policies, and stakeholder input. This task includes development of a framework for evaluating policy alternatives and recommending Mobility Program policies for, at a minimum, the following areas:

- Tolling hours of operation, high occupancy vehicle (HOV) and exempt vehicle requirements and pricing rate structure;
- Policies and processes to set and modify the toll schedule and level(s), transit voucher requirement, and transit service levels;
- Policies for coordinating with SFMTA, which will set parking fee policies;
- Definition of transit pass pricing policies and process to allow for the cost of a prepaid transit pass to be built into the housing costs and hotel rates;

Deliverables:

Draft Project Description Memorandum (Complete) Policy Options Framework (Complete) Memorandum recommending Treasure Island Mobility Management Program policies (Target completion date FY 2014/15 Q4) Final Project Description Memorandum (Target completion date FY 2014/15 Q4)

Task 2.2 – Demand Analysis

Start Date: FY 2013/14 Q2 End Date: FY 2014/15 Q2

The objective of this task is to analyze the demand profiles of alternative mobility management scenarios (e.g., varying levels or hours of operation of the congestion toll; varying levels of transit service) in sufficient detail to support the financial analysis.

This task will make use of the SFCTA's SF-CHAMP travel demand forecasting model. The Transportation Authority will conduct all modeling work with Consultant's lead on preparing all modeling inputs and analysis of outputs.

<u>Deliverables</u> Up to seven SF-CHAMP model runs (scenarios) (Underway; target completion date FY 2014/15 Q2) Model outputs Memorandum summarizing scenario definitions and demand profiles (Underway; target completion date FY 2014/15 Q2)

Task 2.3 - Planning Level Cost Estimates (Capital & Operating)

Start Date: FY 2013/14 Q4 End Date: FY 2014/15 Q2

This task will produce a preliminary estimate of the cost to implement the entire Mobility Management Program, including the congestion pricing and additional program elements to be funded through pricing revenues. The cost estimate will include appropriate contingencies and allowances for standard items. Estimate will include the up-front fixed and variable capital and operating costs of program implementation (including contingencies and soft costs). The estimate will include costs associated with initial capital investment necessary to operate on day 1, as well as ongoing maintenance and operations of the subcomponent systems: 1) congestion pricing system, 2) parking management and pricing system, 3) transit operations, and 4) other demand management and transportation elements of the Transportation Program. A procurement approach to use as the assumption for this Task will also be developed. These figures will

provide the necessary fixed operating costs (including financing and re-capitalization costs) and variable operating costs to support the financial analysis of the proposed project. Sensitivity tests on the operations and maintenance costs will be performed and appropriate contingencies for use in financial assessment will be developed.

<u>Deliverables:</u>

Draft and Final Memorandum describing conceptual capital, operating, and maintenance cost estimates and recommended contingencies (Underway; target completion date FY 2014/15 Q2)

Task 2.4 – Financial Analysis

Start Date: FY 2013/14 Q3 End Date: FY 2014/15 Q3

The objective of this task is to analyze the financial profile of the Transportation Program Alternative Scenarios identified in previous tasks, and test any further policy options. The outcome of this task will support a revised Project Description that is sufficiently detailed to support the Phase 1 Engineering deliverables (Concept of Operations (ConOps) and draft Systems Engineering Management Plan (SEMP)).

This task will develop a financial model capable of testing the performance of alternative scenarios in each of the horizon years identified in Task 2.1, using variations of inputs including: pricing policies, demands, capital costs, financing/return on investment costs (if any), and operating and maintenance costs prepared as part of the other activities in the pre-implementation scope of work.

This task will be conducted iteratively with Task 2.2, to understand the effects of alternative fee structures, discounts, pace of growth and other policies on the financial sustainability of the Program.

Based on results of financial analysis, this task will recommend refinements to the Project Description and provide assumptions about the Program's financial profile, project delivery approach, schedule and funding plan.

Deliverables:

Financial Model capable of testing alternative financial scenarios and risk analysis (Complete) Memorandum describing financial analysis framework, Scenario definitions, financial assumptions, and results (Underway; target completion date FY 2014/15 Q3)

Task 2.5 - Transportation Program Revised Project Description (Policies) and Final Report

Start Date: FY 2013/14 Q3 End Date: FY 2014/15 Q4

This task will revise the initial Project Description developed in Task 2.1 based on the results of Tasks 2.2 through 2.4. The revised Project Description will include a discussion of recommended policies in sufficient detail to support the ConOps and draft SEMP that will be developed in element 3 of Phase 1. The task will identify outstanding areas to be further refined and developed in future phases and identify key risks to address going forward.

This task will produce a final study report that summarizes the findings of Study analyses and recommends program policies in an executive summary for consideration by the TIMMA Board of Directors and other stakeholders. The reports will include summarizes of cost estimates and financial analysis completed in earlier tasks.

Deliverable:

Final Study Report with Executive Summary and technical appendices (Target completion date FY 2014/15 Q4)

Element 3: Engineering

Start Date: FY 2013/14 Q4

End Date: FY 2014/15 Q4

This Task will prepare key preliminary engineering documents for the Mobility Management Program: the ConOps and the draft SEMP.

Task 3.1 – Procurement of Consultant Services for System Engineering Activities

The purpose of this task is secure consultant resources for the completion of system engineering activities including the development of the ConOps. These services are typically referred to in shorthand as a System Manager.

<u>Deliverables:</u> RFP for System Manager Procurement (complete), Executed Consultant Contract (complete, FY 2014/15 Q1)

Task 3.2 - Revised Project Definition (Systems)

Start Date: FY 2014/15 Q3 End Date: FY 2014/15 Q4

The purpose of this task is to refine the Project Description of the Mobility Management Program developed in Task 2.1 (and revised with policy recommendations in Task 2.5) to describe systems requirements. In particular, the revisions will describe the relationship between the tolling system and the SFMTA-owned and operated parking pricing system; evaluate operating parameters for the systems that have been assumed in the planning work; and describe the level for which these systems will be integrated (both financially and technically).

Key elements of this task will be to confirm the level of integration recommended for the parking pricing system and the tolling system and to outline the institutional and technological framework for the development, deployment and operation of the tolling system. The current assumption for the parking system on Treasure Island is that it will be managed by SFMTA and will be modeled after the SFPark System. The System Manager will assist the Transportation Authority in the development of a strategy for coordinating the tolling systems with the SFMTA's implementation of the parking pricing system on Treasure Island. The strategy will recommend a framework for assumptions about the parking system operation and coordination of the parking pricing system and the tolling system.

This task will at a minimum evaluate and make recommendations on the following:

- Evaluation of the current planning level system definition for the toll system
- Framework for coordinating the parking pricing system with the tolling system

<u>Deliverables:</u>

Revised definition of the tolling systems, including a recommended strategy for coordinating the tolling and pricing systems (Target completion date FY 2014/15 Q4)

Task 3.3 - Concept of Operations Document and Preliminary System Development

Start Date: FY 2014/15 Q2 End Date: FY 2014/15 Q4

The purpose of this task is to define the systems operating concepts for the toll system, documenting how the system will be designed, constructed, operated, maintained and administered. This task will include the development of the ConOps document and the draft SEMP.

The ConOps will describe the elements of the system and how it will operate and will also outline the roles and responsibilities of partner agencies. Key elements of the ConOps will include:

- A description of the project organization and management structure from the planning phase through operations
- Identification of key milestones and decision points for each phase of development

- Further definition of the physical and operational characteristics of the system to support a more detailed preliminary system design
- Proposed facility conceptual design including location of toll zones
- Operating concept for the system
- Roles and responsibilities of key project partners and stakeholders for each phase of the project development, deployment and operations
- Technical requirements of the system
- Revised capital and operating cost estimates
- Approach to back office processing and customer support
- Approach to enforcement of the tolling system

The draft SEMP will build on the ConOps document to develop a more detailed definition of the system requirements. The System Requirements to be defined will include the functional, performance, operational, data, administrative, maintenance and interface requirements for the proposed system. Preliminary system design will be advanced sufficiently to define the scope of work that will be included in the system integrator Request for Proposals.

Key elements of the draft SEMP will include:

- System Requirements
- Work and Deployment Plan: a schedule and plan for the installation of all equipment, field testing and acceptance for all equipment and software deployed at the roadside, Toll Data Center (TDC) and Transportation Management Center (TMC). The plan will identify all critical milestones and define the roles and responsibilities for oversight of the installation. The plan will also include the steps and schedule for deploying the various civil elements that will be required to support the deployment of the system.
- Operations and Maintenance Plan: a conceptual operations and maintenance plan using the system requirements developed in the previous task. This plan will document the strategies to operate, administer and maintain the system. The Plan will incorporate the recommendations from the ConOps document to define and describe staff, contract and financial resources that will be required to effectively operate, administer, maintain and monitor the system. The operating and monitoring strategies will support the data collection and system evaluation requirements of the Performance and Evaluation Plan.
- Enforcement Plan: evaluates both technology-based automated enforcement options as well as the use of law enforcement personnel for visual enforcement of the system.
- Performance and Evaluation Plan: will identify the systems needs for monitoring and evaluating Program performance.

<u>Deliverables (SEMP target completion date FY 2014/15 Q4):</u> Draft and Final Concept of Operations Plan Draft System Requirements and Preliminary System Design Document Draft Work and Deployment Plan Draft Operations and Maintenance Plan Draft Enforcement Plan Draft Performance and Evaluation Plan

Remaining scope of work:

The remaining scope of work after Phase 1 of the planning and conceptual engineering phase is shown below. It reflects an anticipated opening date of approximately January 2018 to correspond to first development occupancy.

- Phase 2 of planning and conceptual engineering phase includes ongoing agency administration and governance activities (i.e., TIMMA Board meetings), development of policies and service plans for opening years, development of TDM programs, bicycle and carshare planning, and preliminary engineering through the final SEMP.
- Design engineering includes civil design (July 2015 April 2016) and final systems design (Sept 2016 April 2017).
- Advertise for construction refers to procurement of the system integrator (April 2016 Sept 2016). In addition to completing the design engineering, the system integrator will install the software and other systems, and oversee civil construction as applicable.
- Start construction (April 2017 Nov 2017)
- Project closeout includes first year of operations & warranty period for system integrator (Jan 2018 Jan 2019)

FISCAL YEAR CASH FLOW DISTRIBUTION FOR CURRENT PROP K REQUEST

Use the table below to enter the proposed cash flow distribution schedule (e.g. the maximum Prop K/Prop AA funds that are guaranteed to be available for reimbursement each fiscal year) for the current request. If the schedule is more aggressive than the Prop K/Prop AA Strategic Plan and/or 5YPP, please explain in the text box below how cash flow for other projects and programs will be slowed down to accommodate the current request without exceeding annual cash flow assumptions made in the Strategic Plan.

San Francisco County Transportation Authority Prop K Sales Tax Program Allocation Request Form

The San Francisco Municipal Transportation Agency (SFMTA) requests a total of \$240,000 in Prop K funds for the Western Addition Community-Based Transportation Plan (CBTP) [NTIP Planning] project. This request includes \$100,000 in NTIP Planning funds (District 5) and \$140,000 to fully fund the project. The SFMTA will also use \$60,000 in Metropolitan Transportation Commission (MTC) CBTP grant funds. CBTP funds are intended to support community-based planning in Communities of Concern (CoC)¹ throughout the nine county Bay Area region, including San Francisco's Western Addition/Haight/Fillmore CoC. The objectives of MTC's CBTP grant program align closely with the Transportation Authority's NTIP—both require a collaborative planning process with community stakeholders and both are intended to help build a pipeline of projects that can compete for future Prop K, MTC or other funds.

Project Background

The Western Addition is a traditionally underserved CoC with a high concentration of low-income housing and, as a historic center of San Francisco's African-American community, a large population of minority residents. As a legacy of urban renewal projects in the 20th century, the neighborhood has a number of wide streets, such as Geary Boulevard and Webster Street, and one-way streets, including Turk Street that encourage high vehicle speeds and are detrimental to pedestrian safety.

Project Need

The Western Addition is centrally located within San Francisco and is frequently used by through traffic. Its wide streets like Geary Boulevard and Webster Street as well as Turk Street lend it to high vehicle speeds and have been identified as high-injury corridors by the SFMTA's Vision Zero, a policy and effort to eliminate all traffic-related fatalities by 2024. The Western Addition has also experienced multiple severe pedestrian injuries and fatalities due to motor vehicles. The area has one dedicated bike lane on Webster Street and two bike routes along Post and McAllister Streets, however the increase bicycle volumes in the area warrant a need for additional bike infrastructure.

Project Description and Benefits

The Western Addition CBTP will foster collaboration between local residents, community-based organizations, and local governments as well as build community capacity by involving community-based organizations in the planning process. The process will involve residents in identifying and assessing key transportation needs in the Western Addition; such as pedestrian conditions, streetscape vitality, transit service efficiency, and parking management. Potential project concepts for development could include pedestrian improvements along Geary Boulevard (e.g., at Steiner) or traffic calming along Webster Street, Turk Street, or surrounding John Muir Elementary. In order to assess these needs the study will include two rounds of public outreach, data collection, and the development and evaluation of up to three conceptual design alternatives. A key objective of the

¹ Communities of Concern in San Francisco as defined by MTC include Downtown/Chinatown/North Beach/Treasure Island, Tenderloin/Civic Center, South of Market, Western Addition/Haight/Fillmore, Inner Mission/Potrero Hill, Bayview/Hunters Point/Bayshore, Outer Mission/Crocker-Amazon/Ocean View. Local San Francisco agencies plan to revisit and potentially adjust these designations in the coming year.

San Francisco County Transportation Authority Prop K Sales Tax Program Allocation Request Form

plan is to work with community partners to identify transportation needs and create a blueprint for implementation by developing and prioritizing transportation improvements from the community's perspective.

Tasks and Deliverables

Implementation

This project will be completed by SFMTA, the lead agency. The appointed Community Based Organization (CBO) will coordinate the public outreach for the project support. If applicable, a consultant team will provide technical assistance on the alternative transportation improvement concepts, analysis and graphics. The NTIP Planning requires a robust community engagement strategy and this will start to be developed in the forthcoming project charter and prepared as a deliverable once the CBO is on board.

San Francisco County Transportation Authority Prop K Sales Tax Program Allocation Request Form

Prioritization

The requested Prop K funds will be drawn from the Transportation/Land Use Coordination (EP 44). This project is included in the Board-adopted 5-Year Prioritization Program (5YPP) for Transportation and Land Use Connection using the established scoring mechanism within that 5YPP.

MAJOR LINE ITEM BUDGET

1. Provide a major line item budget, with subtotals by task and phase. More detail is required the farther along the project is in the development phase. Planning studies should provide tasklevel budget information.

2. Requests for project development should include preliminary estimates for later phases such as construction.

3. Support costs and contingencies should be called out in each phase, as appropriate. Provide both dollar amounts and % (e.g. % of construction) for support costs and contingencies. 4. For work to be performed by agency staff rather than consultants, provide base rate, overhead multiplier, and fully burdened rates by position with FTE (full-time equivalent) ratio. A sample

format is provided below.

5. For construction costs, please include budget details. A sample format is provided below. Please note if work will be performed through a contract.6. For any contract work, please provide the LBE/SBE/DBE goals as applicable to the contract.

FISCAL YEAR CASH FLOW DISTRIBUTION FOR CURRENT PROP K REQUEST

Use the table below to enter the proposed cash flow distribution schedule (e.g. the maximum Prop K/Prop AA funds that are guaranteed to be available for reimbursement each fiscal year) for the current request. If the schedule is more aggressive than the Prop K/Prop AA Strategic Plan and/or 5YPP, please explain in the text box below how cash flow for other projects and programs will be slowed down to accommodate the current request without exceeding annual cash flow assumptions made in the Strategic Plan.

| Prop K Funds Requested: | | \$240,000 | |
